WORK EXPERIENCE

National Public Procurement Agency (Bogota-COL) - February 2021 - December 2022

[Web Project Developer](#) Jan-2022 - Dec-2022

[Data Product Developer](#) Aug-2021 - Dec-2021

[Data Analyst Internship](#) Feb-2021 - July-2021

- Profile: As an IT project developer, my aim is to create innovative solutions that enhance organizational efficiency and productivity. I am deeply passionate about developing top-notch software and thrive in collaborative, multidisciplinary teams. With a specialization in problem-solving, I continuously stay updated on the latest technological trends. My primary focus is on satisfying client requirements while consistently surpassing their expectations. Along with the developer team, we designed an intuitive application named [Procurement Process Search Engine](#). This application is capable of optimizing a manual data process and analyzing transactions to build logical business intelligence models for real-time reporting needs. Time optimized up to 500%. Experience leading a team of developers to deliver complex software applications.
Link: <https://consultaprocesos.colombiacompra.gov.co/>
- Collaborated throughout the systems development lifecycle, from gathering requirements to production releases. Documented technical workflows, translating complex concepts and software development methodologies into manuals for future reference by IT personnel. Contributed to over 10 documented IT projects and conducted reviews for more than 30 projects.

Carnival Cruise-Line (Miami-USA) - May- 2018 - Dec 2019

[Onboard Guest Service Associate](#)

- As the company's representative, I engaged with both international and domestic customers, handling daily inquiries and addressing any issues to create an exceptional, memorable, and meaningful customer experience worldwide. I had the privilege of visiting 15 countries, collaborating with individuals from over 58 nationalities, and accumulating over 500 days of overseas operational experience.
- I was honored with the "Employee of the Year" award for Carnival Sensation Vessel 2019, thanks to my unwavering positive attitude towards guests and crew members. I prioritized fostering healthy interdepartmental relationships and diligently maintained open and effective communication channels.

FORMAL EDUCATION

Academlo - Jan 2023 - May 2023

Full Stack Web development and Computer Science

Degree: <https://certificates.academlo.com/en/verify/00938391609012>

Ean University - April 2017 - July 2021

MBA, IT Project Management

Degree: https://drive.google.com/file/d/10xu00Boxbjd-dqgwQpewKnVSpZw6hZR_/view?usp=sharing

Ean University - April 2017 - July 2021

B.A., International Business and & Modern Languages

Degree: <https://drive.google.com/file/d/1KfeC5kBBkQxLzzhJWITaVi9eQfsS1k7-/view?usp=sharing>

Professional ID: <https://drive.google.com/file/d/1hHBIXb8wdGToubVf4FOI6hlc8x272qx/view?usp=sharing>

CERTIFICATIONS

- Web application development with React ([Academlo, 2023](#)),
- Web development fundamentals ([Academlo, 2023](#)),
- Scrum Master Agile Methodologies ([CertiProf, 2022](#)),
- Business Intelligence and Big Data Applied to Strategic Processes ([Ean University, 2020](#)),
- Machine Learning and Deep Learning ([Ean University, 2020](#)),
- ESG Research Challenge, ([San Ignacio University, 2020](#)),
- Digital communication in multicultural environments ([ISIT-France University, 2019](#)),
- Google Ads for business - ([Developers Student Club, 2021](#))
- C2 English Level Proficient - ([EF SET Certificate, 2023](#))

PERSONAL PROJECTS

Ecommerce App with React, Mobile First - May 2023

E-commerce application developed with React

- Using React Router and Redux Toolkit, I successfully developed three key pages for ecommerce applications: the shopping cart screen, product details screen, and product list screen. These pages were designed to simulate an online store experience, incorporating API consumption for electronic products and enabling seamless user login functionality.
- Link: <https://vlf-E-shop.netlify.app/>

Portfolio Landing Page with TailwindCSS - UI/UX - May 2023

Completed full stack landing page project.

- I possess expertise in user experience design, user interface design, usability testing, interaction design, and front-end development. Utilizing these skills, I successfully developed four key landing page functionalities: Hero Image, Headline and Subheading, Forms, and Call to Action.
- Link: <https://vivianlafarina-full-stack-developer.netlify.app/>

Pokedex App with React router-Dom y Redux - April 2023

Interactive App, mobile first UX/UI Pokemon's information display.

- In the Pokedex app, I implemented the routes /pokedex and /pokedex/:id, allowing users to navigate through different pages and view specific entries. The captured data is stored locally and presented on a separate page/route. Additionally, I developed the Character.origin() method, which returns a Location object.
- The app also features a filter select option, informative Pokemon information cards, and an animated interface. With over 1200 Pokemon available to explore, the Pokedex app provides a comprehensive experience for Pokemon enthusiasts.
- Link: <https://pokedex-vlf.netlify.app/>

Rick & Morty App Using CustomHook and useEffect - April 2023

App that provides a wrapper around the famous American animated series, using axios.

- This module exports three fundamental entities from the API: Character, Episode, and Location. Each entity module offers functions for the equivalent REST endpoints, including get, get_all, and get_multiple. These functions are accompanied by matching structs to ensure seamless data compatibility.
- Link: <https://vlf-rick-and-morty-app.netlify.app/>

SKILLS

- Design practical solutions to solve problems and analyze data to provide value insights.
- Participate in code reviews, testing.
- Provide the technology for a platform that facilitates monthly requests.
- Work with big data and predictive analytics on a distributed system.
- Collaborate with the developing team, product owners, client services, to innovate and get the tasks done.
- Review and refactor existing code into high quality code.
- Design reliable and reusable code

Tecnologías

Javascript, Html, Css, React, Redux, Node.js, Net, React Bootstrap, Github, MySQL, Power BI, Cloud Computing (Azure), Google Analytics, Jira, Bitbucket, Project ,Trello
